The Future of Man - Pierre Teilhard De Chardin - 2004-04-20
The Future of Man is a magnificent introduction to the thoughts and writings of Pierre Teilhard de Chardin, one of the few figures in the history of the Catholic Church to achieve renown as both a scientist and a theologian. Trained as a paleontologist and ordained as a Jesuit priest, Teilhard de Chardin devoted himself to establishing the intimate, interdependent connection between science—particularly the theory of evolution—and the basic tenets of the Christian faith. At the center of his philosophy was the belief that the human species is evolving spiritually, progressing from a simple faith to higher and higher forms of consciousness, including a consciousness of God, and culminating in the ultimate understanding of humankind’s place and purpose in the universe. The Church, which would not condone his philosophical writings, refused to allow their publication during his lifetime. Written over a period of thirty years and presented here in chronological order, the essays cover the wide-ranging interests and inquiries that engaged Teilhard de Chardin throughout his life: intellectual and social evolution; the coming of ultra-humanity; the integral place of faith in God in the advancement of science; and the impact of scientific discoveries on traditional religious dogma. Less formal than The Phenomenon of Man and The Divine Milieu, Teilhard de Chardin’s most renowned works, The Future of Man offers a complete, fully accessible look at the genesis of ideas that continue to reverberate in both the scientific and the religious communities.

The Phenomenon of Man - Pierre Teilhard de Chardin - 2008-11-04
Visionary theologian and evolutionary theorist Pierre Teilhard de Chardin applied his whole life, his tremendous intellect, and his great spiritual faith to building a philosophy that would reconcile religion with the scientific theory of evolution. In this timeless book, which contains the quintessence of his thought, Teilhard argues that just as living organisms sprung from inorganic matter and evolved into ever more complex thinking beings, humans are evolving toward an "omega point"—defined by Teilhard as a convergence with the Divine.

Illuminating Teilhard's thought with excerpts from his unpublished notes and correspondence, the author relates Teilhard's ideas to his spiritual life, tracing the origin of his thought and its development. This spiritual journey describes Teilhard's early years and family background; his training as a Jesuit; the preparation of his scientific career; and his attainment of intellectual maturity during World War I.

The Divine Milieu - Pierre Teilhard de Chardin - 2015-10-07

The Divine Milieu is a meditation book for intellectuals and is addressed primarily to those who waver rather than to Christians who are firmly established in their beliefs. However, as the author writes in the preface, there is not much in this book on moral evil and sin. Teilhard de Chardin assumes that he is dealing here with souls who have already turned away from such errors. The subject to be treated in these pages is actual, supernaturalized human beings, seen in the restricted realm of conscious psychology.

Christianity and Evolution - Pierre Teilhard de Chardin - 2002-11-18

The author of The Phenomenon of Man reconciles passionate faith with the rigor of scientific thinking. With his unique background as a geologist, paleontologist, and Jesuit priest, Pierre Teilhard de Chardin was a powerful exponent of the view that scientific theories could comfortably coexist with religious faith. To this day, his ideas provoke passionate debates in communities that view science and faith as necessarily separate ideologies. In this collection of nineteen essays, Teilhard seeks to illuminate a middle ground between science and religion that he felt both disciplines could accept. He explores the Fall and original sin, the possibility of life on other planets, and the role that God may have played in the process of human evolution, successfully challenging contemporary theologians to rethink their views of the universe and its creation. “Like other great visionary poets—Blake, Hopkins, Yeats—Teilhard engages the reader both intellectually and sensually.” —The Washington Post Book World “An excellent blend of theological speculation with practical or ascetical application.” — Catholic Telegraph

The Jesuit and the Skull - Amir Aczel - 2008-11-04

From the New York Times bestselling author of Fermat?sf Last Theorem, ?an extraordinary story?( Philadelphia Inquirer) of discovery, evolution, science, and faith. In 1929, French Jesuit priest Pierre Teilhard de Chardin was a part of a group of scientists that uncovered a skull that became known as Peking Man, a key evolutionary link that left Teilhard torn between science and his ancient faith, and would leave him ostracized by his beloved Catholic Church. His struggle is at the heart of The Jesuit and the Skull, which takes readers across continents and cultures in a fascinating exploration of one of the twentieth century's most important discoveries, and one of the world's most provocative pieces of evidence in the roiling debate between creationism and evolution.

**The Divine Milieu** - Pierre Teilhard de Chardin - 2001-11-06
The essential companion to Pierre Teilhard de Chardin's The Phenomenon of Man, The Divine Milieu expands on the spiritual message so basic to his thought. He shows how man's spiritual life can become a participation in the destiny of the universe. Teilhard de Chardin -- geologist, priest, and major voice in twentieth-century Christianity -- probes the ultimate meaning of all physical exploration and the fruit of his own inner life. The Divine Milieu is a spiritual treasure for every religion bookshelf.

**The Human Phenomenon** - Pierre Teilhard de Chardin - 2003-07-01
Pierre Teilhard de Chardin (1881-1955) was a priest, paleontologist and geologist whose highly original publication, LE PHENOMENE HUMAIN, attracted world-wide attention when it was first published. He wrote of the beginnings of our planet, the emergence of life, the birth of thought and the development of socialization in order to give humankind the inner vision necessary to thrive in an expanding universe. The original translation into English contained many fundamental mistakes clouding our understanding of Teilhard de Chardin's vision. Sarah Appleton-Weber has based her new translation, which is endorsed by the Teilhard de Chardin Foundation (Paris), on her careful comparison of the four versions of the French text. Poet and scholar Appleton-Weber, who has closely studied Teilhard's essays, letters, and other writing, gives a consistent and coherent voice to this translation of Teilhard's book.

**Hymn of the Universe** - Pierre Teilhard de Chardin - 1969

This book includes Teilhard de Chardin's great mystical meditation on the
cosmic influence of the Eucharist, "Mass on the World"; three short stories,
"Christ in the World of Matter"; an essay, "The Spiritual Power of Matter";
and "Pensees" on the same themes chosen from his published and
unpublished works. Much can be learnt of the spiritual life of the scientist
priest, and the ideas behind his philosophy, from richness, faith, spiritually
and abundant hope of his mystical 'milieu'. In the language of poetry, he
communicates both his reverence for the material world and his constant
awareness of the spiritual.

Pierre Teilhard de Chardin and C.G. Jung: Side by Side is an anthology written by authors from different backgrounds, sharing how the lives of Pierre Teilhard de Chardin and Carl Gustav Jung impacted them personally and/or how they understand the relevance of these two men for our present times. Contributors to this fourth volume of the Fisher King Review include: John Dourley, Peter Dunlap, Barbara Faris, Fred R. Gustafson, John Giannini, Richard W. Hanhardt, Robert Henderson, Steven B. Herrmann, Jane A. Kelley, Jon Magnuson, Francisco (Paco) Martorell, Stan V. McDaniel, Dennis L. Merritt, and Laura A. Weber. Though C.G.Jung and Pierre Teilhard de Chardin never met, their independent intellectual inquiries and courageous researches pushed the personal and collective soul forward and placed both of them at the forefront of needing to understand and integrate on a planetary level the core values of their expansive work. Both Jung and de Chardin were concerned with science and religion and operated within these paradigms. Both of them shook the world by offering up views, on one hand, of the profound depths of the human psyche and, on the other, presenting a profound re-consideration of evolution as a process leading toward a social unification of the planet. One used the concept of individuation, the other spoke of evolution. Each took these concepts to a creative depth so much so that the world they lived in either deeply admired or detested them. Both had conflicts in their chosen fields. Jung was a psychologist who used the field of science to explore the religious depths of the human soul by studying mythology, world religions, folk tales, dreams, and human behavior. Chardin used the ground of religion to work in the field of science via paleontology, geology, and physics as he explored a deeper and relevant understanding of evolution. Though each began from different intellectual platforms, they each crisscrossed into the other's territory of inquiry and related their ideas to include the full scope of humanity. One went deeply into soul and found matter, whereas, the other went deeply into matter and found soul. In their own ways both spent their careers trying to heal the split between spirit and matter in the weltanschauung of their times reflected in the human psyche and in the general religious views permeating most of Western culture.
Teilhard de Chardin on Love - Louis M. Savary - 2017
The authors offer a "first" summary of Teilhard's thoughts on love, a central element in his evolutionary spirituality, presented in accessible language for the ordinary reader. Teilhard de Chardin's The Phenomenon of Man Explained - Louis M. Savary - 2020
Teilhard's book The Human Phenomenon (The Phenomenon of Man) developed many of the fundamental concepts of Teilhard's evolutionary thinking which were the foundational ideas for his integration of evolutionary science with Christian theology and spirituality. In this book, Savary skilfully examines the connection of Teilhard's evolutionary scientific ideas and his spirituality and theology. Consequently, Teilhard de Chardin--The Human Phenomenon Explained presents Teilhard's scientific ideas accessibly while also explaining the text, showing how the ideas presented in each section may be directly applied to theological thinking, spiritual practices, and moral behavior.
