What makes a person's life meaningful? Thaddeus Metz argues that no existing theory does full justice to the key requirements of morality, enquiry, and creativity. He discusses sentences, three-strikes-and-you're-out laws, "dangerous offender" and "sexual predator" laws, "truth in sentencing," and life without the possibility of parole. What does retribution mean now for retributivism? Retributivism Has a Past: Has It a Future? brings thoughtfulness and rigor back into the retributivism debate. This collection of essays trains retribution. Retribution trumped rehabilitation; proportionality outweighed prevention. The retributivist sea change was short-lived, however. After a few decades, the public lost interest. The ideas of those who defended retributivism became influential again, and although such work strengthens the theoretical foundations of these theories, it won't necessarily build anything on top of those foundations, nor will it change the practice of justice. Has It a Future? offers serious theoretical critiques of the recent past and justifications for possible futures.

The Contribution of Anarchists in Modern Political Theory

Robert Nozick - 1974

This book presents a range of classical philosophical approaches in order to show that they are unsuitable as a foundation for human rights. Only the conception of human dignity –based on the Kantian distinction between price and dignity– can provide a sufficient basis. The derivation of human rights from the principle of human dignity is likely to offer a better explanation of human rights and their enforcement.
