The Beauty - Aliya Whiteley - 2018-01-16
Nominated for the Shirley Jackson and Saboteur awards, this game-changing story was chosen by Adam Nevill as one of his favourite horror short stories: “What a refreshing gust of tiny spores this novella explodes into, and I inhaled them all with glee”. Somewhere away from the cities and towns, in the Valley of the Rocks, a society of men and boys gather around the fire each night to listen to their history recounted by Nate, the storyteller. Requested most often by the group is the tale of the death of all women. They are the last generation. One evening, Nate brings back new secrets from the woods; peculiar mushrooms bodies lie buried. These are the first signs of a strange and insidious presence unlike anything ever known before... Discover the Beauty.
Night of the Animals - Bill Broun - 2016-07-05

In this imaginative debut, the tale of Noah’s Ark is brilliantly recast as a story of fate and family, set in a near-future London. Over the course of a single night in 2052, a homeless man named Cuthbert Handley sets out on an astonishing quest: to release the animals of the London Zoo. When he was a young boy, Cuthbert’s grandmother had told him he inherited a magical ability to communicate with the animal world—a gift she called the Wonderments. Ever since his older brother’s death in childhood, Cuthbert has heard voices. These maddening whispers must be the Wonderments, he believes, and recently they have promised to reunite him with his lost brother and bring about the coming of a Lord of Animals... if he fulfills this curious request. Cuthbert flickers in and out of awareness throughout his desperate pursuit. But his grand plan is not the only thing that threatens to disturb the collective unease of the city. Around him is greater turmoil, as the rest of the world anxiously anticipates the rise of a suicide cult set on destroying the world’s animals along with themselves. Meanwhile, Cuthbert doggedly roams the zoo, cutting open the enclosures, while pressing the animals for information about his brother. Just as this unlikely yet loveable hero begins to release the animals, the cult’s members flood the city’s streets. Has Cuthbert succeeded in harnessing the power of the Wonderments, or has he only added to the chaos—and sealed these innocent animals’ fates? Night of the Animals is an enchanting and inventive tale that explores the boundaries of reality, the ghosts of love and trauma, and the power of redemption.

**Placebo** - Sead Mahmutefendić - 2014-11-21
Satirical and grotesque novel: ‘Placebo: The Beauty and Horror of Lies’ is one of the most successful novels written by Sead Mahmutefendic. This is the novel of one of the most interesting, most controversial and most prolific South Slav writers from the end of the XX and the beginning of the XXI century. It is a novel about the character of the one Gojko R., whose meta-fiction and pseudo reality attract readers with its rhythm, dynamics and refined environment. Constrained with his own frustrations and feelings of solitude and rebellious slavery Gojko R. finds a refuge in fantastic and surreal stories and monologues about his invented successes and triumphs, re-shaping the vision of reality which sharpens up the picture of his life and character. The message
of the novel is: ‘Isn’t the laugh, multidimensional and vociferous one of the anthropological panaceas for expensive enjoyments and of the ways of survival.

Luc Tuymans - Eva Meyer-Hermann - 2018-01-09
This first volume in a catalogue raisonné of Tuymans's paintings surveys nearly 200 works from the vital early years of his career. Credited with a key role in the revival of painting in the 1990s, Belgian artist Luc Tuymans (b. 1958) continues to produce subtle, and at times unsettling, works that engage with history, technology, and everyday life. This first volume in a catalogue raisonné of Tuymans's paintings surveys nearly 200 works that were vital to his artistic development. The years 1972 to 1994 witnessed the maturation of his signature
This first volume in a catalogue raisonné of Tuymans's paintings surveys nearly 200 works that were vital to his artistic development. The years 1972 to 1994 witnessed the maturation of his signature method of painting from preexisting imagery--such as magazine images, Polaroids, and television footage--as well as his first solo exhibition. Also dating from this period are many of his seminal canvases, along with ten poignant portraits of the ailing human body and the enigmatic series Superstition that comprised his first works exhibited in the United States. The catalogue features brilliant new photography of each of the paintings and an illustrated chronology with archival images and installation shots of the works in this volume. This publication is a testament to Tuymans's persistent assertion of the relevance and importance of painting--a conviction that he maintains even in today's digital world, when his work continues to be a touchstone for artists and scholars.

Awesome! Scenes vary from a gorgeous shot of the NASA space station being sucked into a black hole to an elegant portrayal of the next Ice Age. Also included are beautiful depictions of zombie uprisings, picturesque plagues ravaging the human race, aesthetically pleasing aliens plotting to destroy planet Earth, and much more! To add some irony, each illustration is accompanied by an optimistic quote: envision “‘Be thou the rainbow in the storms of life. The evening beam that smiles the clouds away, and tints tomorrow with prophetic ray.’ —Lord Byron” as tornadoes tear through cities around it. Or what if it’s all a dream and we’re just brains in vats? What if nothing’s tangible and the world around us is all just perception? What if all that you love doesn’t exist and is only simulated? It doesn’t mean you can’t color! So embrace your inner nihilist, and the reality that you might not be sticking around too much longer. Pick up your colored pencils and The Apocalypse Coloring Book. You’re going to need a way to cope when things start to go downhill.

Few artists have changed the manner in which photographic images are made, read, and received over the past two decades as dramatically as German photographer Wolfgang Tillmans (b. 1968). One of the most important and distinctive artists to emerge in the 1990s, Tillmans’s work is internationally recognized for its powerful reflections on the often overlooked objects and moments in everyday life. With images culled from the entirety of Tillmans’s career, this generously illustrated book accompanies the artist’s first retrospective exhibition in the United States and features the potent effects of his portraits, abstractions, and structural and sculptural motifs. Essays by leading scholars examine the context of the German art and pop cultural scene in which Tillmans first began working in the late 1980s; his use of magazines as both venue and source materials; his unique approach to portraiture; his ability to create a sense of intimacy between the viewer and subjects ranging from his friends to distinctive approach to presenting his images in displays and installations. A fascinating look at the breadth of Tillmans’s career to date, including his most recent new work, this book demonstrates the renowned abilities of one of the art world’s most revolutionary photographers.

Art to Come - Terry Smith - 2019-09-06
In Art to Come Terry Smith—who is widely recognized as one of the world's leading historians and theorists of contemporary art—traces the emergence of contemporary art and further develops his concept of contemporaneity. Smith shows that embracing contemporaneity as both a historical concept and a condition of the globalized world allows us to grasp how contemporary art exists in a fluid space of increasing interdependencies, multiple contemporaneous modernities, and persistent inequalities. Throughout these essays, Smith offers systematic proposals for writing contemporary art's histories while assessing how curators, critics, philosophers, artists, and art historians are currently doing so. Among other topics, Smith examines the intersection of architecture with other visual arts, Chinese art

"metalinguistic games" and you find yourself Auster. Although his protagonists often find themselves confronted with hopeless predicaments, they often manage to overcome their crises of orientation by means of creative processes. Art is presented as a strategy to cope with the chaos of the postmodern living situation. Martina Süssenguth looks at Auster's early novels and films and analyses how Auster views art as an experience through which to cope with reality. She examines the inclusion of chance into creative processes as well as Auster's collaborations with contemporary artists like Sophie Calle and Sam Messer.

**Phantasmagoria** - Marina Warner - 2006
Phantasmagoria explores ideas of spirit and soul since the Enlightenment; it traces metaphors that have traditionally conveyed the presence of immaterial forces, and reveals how such pagan
the Society of Psychical Research applied their energies to the question of other worlds and other states of mind: they staged trance seances in which mediums produced spirit phenomena, including ectoplasm. The book shows how this often embarrassing story connects with some of the important scientific discoveries of a fertile age, in psychology and physics. Over a sequence of twenty-eight chapters, with over thirty illustrations in colour and black and white, Phantasmagoria thus tells an unexpected and often uncomfortable story about shifts in thought about consciousness and the individual person, from the first public waxworks portraits at the end of the eighteenth century to stories of hauntings, possession, and loss of self as in the case of the zombie, a popular figure of soulessness, in modern times.

**Phantasmagoria** - Marina Warner - 2006

Phantasmagoria explores ideas of spirit and soul since the Enlightenment; it traces metaphors that have traditionally conveyed the presence of considerable energies to the question of other worlds and other states of mind; it uncovers a host of spirit forms - angels, ghosts, fairies, revenants, and zombies - that are still actively present in contemporary culture. It reveals how their transformations over time illuminate changing ideas about the self. Phantasmagoria also tells the accompanying story about the means used to communicate such ideas, and relates how the new technologies of the Victorian era were applied to figuring the invisible and the impalpable, and how magic lanterns (the phantasmagoria shows themselves), radio, photography and then moving pictures spread ideas about spirit forces. As the story unfolds, the book features the many eminent men and women - scientists and philosophers - who in
and women - scientists and philosophers - who in Christian imagery about ethereal beings are embedded in a logic of the imagination, clothing spirits in the languages of air, clouds, light and shadow, glass, and ether itself. Moving from Wax to Film, the book also discusses key questions of imagination and cognition, and probes the perceived distinctions between fantasy and deception; it uncovers a host of spirit forms - angels, ghosts, fairies, revenants, and zombies - that are still actively present in contemporary culture. It reveals how their transformations over time illuminate changing ideas about the self. As the story unfolds, the book features the many eminent men and women - scientists and philosophers - who in the Society of Psychical Research applied their considerable energies to the question of other worlds and other states of mind: they staged trance seances in which mediums produced spirit phenomena, including ectoplasm. The book shows how this often embarrassing story connects with some of the important scientific discoveries of a fertile age, in psychology and physics. Over a sequence of twenty-eight chapters, with over thirty illustrations in colour and black and white, Phantasmagoria thus tells an unexpected and often uncomfortable story about shifts in thought about consciousness and the individual person, from the first public waxworks portraits at the end of the eighteenth century to stories of hauntings, possession, and loss of self as in the case of the zombie, a popular figure of soulessness, in modern times.

30 Essential Typefaces for a Lifetime - 2006

30 Essential Typefaces for a Lifetime - 2006
The last few decades have been among the most dynamic within recent British cultural history. Artists across all genres and media have developed and re-fashioned their practice against a radically changing social and cultural landscape – both national and global. This book takes a fresh look at some of the themes, ideas and directions which have informed British art since the later 1980s through to the first decade of the new millennium. In addition to discussing some iconic images and examples, it also looks more broadly at the contexts in which a new ‘post-conceptual’ generation of artists, those typically born since the late 1950s and 1960s have approached and developed aspects of their professional practice. Contemporary British Art is an ideal introduction to the field. To guide the reader, the book is organised around genres or related practices – painting; sculpture and installation; and film, video and performance. Extensively illustrated with a wide range of work (both known, and less well-known) from artists such as Chris Ofili, Rachel Whiteread, Damien Hirst, Banksy, Anthony Gormley, Jack Vettriano, Sam Taylor-Wood, Steve McQueen and Tracey Emin, and many more.

What if an obscene variety of bizarre and horrific monsters and environments were pouring into an apocalyptic America from portals to multiple worlds and dimensions, all torn through space-time all over the country? What if you didn't even recognize the city around you anymore? What would you do when Worlds Merge? - Arthur begins to deal with the increased horror of the collapse of Colorado Springs as nightmarish creatures roam the streets, killing survivors, while he desperately tries to locate his family! And the wicked and hungry monsters move faster at night - Chad and some UEA soldiers (and Max the puppy!) have escaped the slaughter in the Geneva lab via Portal Zero itself, and the survivors make their way through the weird
strange, alien streets to find a grocery store for York City, under the UEA headquarters on Manhattan Island. **Aftershock** - Kieran Cashell - 2009-08-30
Accused by the tabloid press of setting out to
'shock', controversial artworks are vigorously
defended by art critics, who frequently downplay
first book to subject contemporary art to a
rigorous ethical exploration. It argues that, in
favouring conceptual rather than emotional
reactions, commentators actually fail to engage
with the work they promote. Scrutinising
notorious works by artists including Damien
Hirst, Jake and Dinos Chapman, Richard
Billingham, Marc Quinn, Sally Mann, Marcus
Harvey, Hans Bellmer, Paul McCarthy, Tierney
Gearon, and Tracey Emin, "Aftershock" insists on
the importance of visceral, emotional and
'ethical' responses. Far from clouding our
judgement, Cashell argues, shame, outrage or
revulsion are the very emotions that such works
set out to evoke. While also questioning the
catch-all notion of 'transgression', this
illuminating and controversial book neither
jumps indiscriminately to the defence of shocking
artworks nor dismisses them out of hand.

In this lively comedy of love and money in sixteenth-century Venice, Bassanio wants to impress the wealthy heiress Portia, but lacks the necessary funds. He turns to his merchant friend, Antonio, who is forced to borrow from Shylock, a Jewish moneylender. When Antonio's business falters, repayment becomes impossible, and by the terms of the loan agreement, Shylock is able to demand a pound of Antonio's flesh. Portia cleverly intervenes, and all ends well (except of course for Shylock).

The Cultural Life of Catastrophes and Crises
- Carsten Meiner - 2012-10-30
Catastrophes and crises are exceptions. They are disruptions of order. In various ways and to different degrees, they change and subvert what we regard as normal. They may occur on a personal level in the form of traumatic or stressful situations, on a social level in the form of unstable political, financial or religious situations, or on a global level in the form of

assumption in this book is that, in contrast to the directness of any given catastrophe and its obvious physical, economical and psychological consequences our understanding of catastrophes and crises is shaped by our cultural imagination. No matter in which eruptive and traumatizing form we encounter them, our collective repertoire of symbolic forms, historical sensibilities, modes of representation, and patterns of imagination determine how we identify, analyze and deal with catastrophes and crises. This book presents a series of articles investigating how we address and interpret catastrophes and crises in film, literature, art and theory, ranging from Voltaire’s eighteenth-century Europe, haunted by revolutions and earthquakes, to the 1994 genocide in Rwanda to the bleak, prophetic landscapes of Cormac McCarthy.
