Occlusal Therapy Assistant Practice Test (updated 2021)

Occlusal therapy (OT) is a profession within healthcare. It is the use of assessment and intervention to develop, recover, or maintain the meaningful activities, or occupations, of individuals or groups. Occlusal therapy (OT) is an allied health profession performed by occupational therapists and occupational therapy assistants (OTAs). OTs often work with people with mental health problems.

Biomechanical Frame of Reference | OccupationalTherapyOT.com

The biomechanical frame of reference in occupational therapy states that the human body is an organism in a dynamic relationship with its environment. The biomechanical frame of reference emphasizes the role of the body in the performance of everyday activities and emphasizes the importance of the interaction between the body and the environment. It recognizes that the body is not a static entity, but rather a dynamic system that is constantly changing and adapting.
